To Whom It May Concern

Dear Sir / Madam

In my capacity as the Employability Support Lead at the Middlesex University Mauritius, I came to know Mr Farhaan Mohammad Sa'ad Beeharry very well. Farhaan joined Middlesex University Mauritius in September 2018 to study for a BSc (Hons) Computer Science (Systems Engineering) degree.

Farhaan is one of those rare people who works very hard and diligently but does so with a smile on his face. He constantly strives for excellence and does not let his thirst for knowledge rule his life. He has the qualities of a good human being namely compassion, empathy, respect, enthusiasm and humility. It should come as no surprise that he is well-liked and admired by his peers.

In the course of his studies, Farhaan showed himself as a responsible, motivated, hard-working student with excellent analytical skills, capable of conducting academic research in accordance with the requirements of a graduate school. His steady academic background, outstanding personal qualities and practical experience are complemented by his demonstrated leadership skills.

Farhaan has also greatly enriched our university life by engaging in extracurricular activities such as being an executive member (Event Organiser) in LaunchTech Society and a member of the Save Animals via Education Society. Farhaan proudly represented Middlesex University Mauritius in the DigiCup 2020 organised by the UOM's ICDDT Society student club and the TechWar 2021 organised by UoM Computer Club. His team ranked second in both competitions. Other activities in which Farhaan was involved include the online International Ludo competition and other gaming nights during the Covid 19 lockdown as well as a fundraising event for the children of Laventure School for the Disabled.

I recommend Farhaan to you without reservation. If you have any further questions with regard to his background or qualifications, please do not hesitate to call me on +2304036400 or email me at d.kalla@mdx.ac.mu.

Thank you

Kind regards

Dalilah Kalla (Ms)
Employability Support Lead
