Dear Sir/Madam,

Reference letter for Mr. Farhaan Mohammad Sa'ad Beeharry

I am very pleased to write a letter of recommendation for Mr. Farhaan Mohammad Sa'ad Beeharry. I have known Farhaan since he joined the university in October 2018. He has been one of my best performing students during the past 3 years.

As his lecturer, I have had an opportunity to observe his participation and interaction in class and to evaluate his knowledge of the subject matter. During the classes, I came to form a favourable opinion of Farhaan due to his excellent work ethics and enthusiasm. I have always observed him very eager to learn and acquire knowledge. I have seen the diligence with which he worked on his course works and I was impressed by his overall perseverance. He put in extra hours as necessary to meet specific deadlines that I set. During seminar sessions, I teamed him up with other students to work on activities. He seemed to work well with the other students, and I found him very personable.

Farhaan is a very bright student. He passed with distinction in the three modules (Java Programming, System Analysis and Design, Software Engineering) I taught him. He has always shown the originality in his thought and systematic methodical approach towards handling of logical, analytical or research problems assigned to him. Farhaan is an independent self-starter. This is evident during this academic year. He has stepped out of his comfort zone to research on topics in Artificial Intelligence. I am very impressed with his passion for learning.

I would expect Farhaan to perform very well in a wide range of environments. I therefore recommend him to you without reservation and please feel free to contact me for further information.

Yours faithfully,

Adityaraj Singh Santokhee

Senior Lecturer in Computer Science, FHEA
Programme Coordinator IT/BIS
IBM Blockchain Developer 2018 – Mastery Award
Oracle Academy Program Member
