To Whom It May Concern

I have known Beeharry, Farhaan Mohammad Sa'ad as a lecturer for several years since he joined the university in 2018 while I covered the modules Computer Architecture and Operating Systems during his first year and User Experience Design during his final year. Farhaan's independence, confidence and dedication to others were demonstrated during both of his group coursework where he provided support to group members and fellow students.

Farhaan developed several skills during his time at Middlesex in respect to game development, programming; paying attention to details; doing public presentations; working in groups and organising user trials and setting up interviews for evaluation.

Farhaan has always come well-prepared for discussions in class and his writing ability demonstrate his analytical skills. Farhaan has always strived for excellence and most of his work has been used for demonstration during the MDX open days. He has also participated in several national competitions and was ranked 2nd for both DigiCup 2020 and TechWar 2021.

Farhaan has been a very down-to-earth and focused person. He has always been respectful towards others and has willingly provided a helping hand to others when they required assistance. I can assure you that Farhaan will be a valuable asset in your company if given the chance.

Yours faithfully,

Dr Priscilla Ramsamy
Area Head– Digital Technologies
Senior Lecturer in Computing
Programme Coordinator for MSc BISM
